PURPOSE: In light of the COVID-19 pandemic, the Texas A&M Engineering Experiment Station’s Research Development Office within the Deputy Director’s Office is accepting responses for RFI (Request for Information) related to COVID-19 research topics.

Given the scale and nature of this unprecedented situation that the world is facing due to the COVID-19 pandemic, we want to assess research and development ideas, needs, expertise, experience, facilities, and resources available to address health related needs for COVID-19. The objective is to assess research opportunities for emergency funding, capabilities, and immediate health care needs for the COVID-19 pandemic that can be addressed by engineers.

RFI PACKAGE:

- The RFI response should include the following sections:
  - Areas of expertise addressing COVID-19.
  - Experimental and computational capabilities.
  - Research priorities that should be pursued.
  - Potential collaborators within TAMUS and beyond including industry and National Labs.

- Use the attached template to submit the response to the RFI.

ELIGIBILITY AND SUBMISSION METHOD:

- All parties internal and external to Texas A&M are eligible.
- Team or single PI responses are welcome.
- Submissions will be accepted and reviewed immediately.
- Submit the RFI response packages via email to proposalsupport@tamu.edu with the subject line RFI #TEES-COVID-19.
